Host: Welcome to live casino. Let me show you around. I think you're going to love it. So Live Casino is exactly what it looks like. It's real live dealers playing with and against real live people. The only difference?

None of these players are actually here. See, Live Casino, right now, is filled with real players, but they're all at home, or anywhere you can connect your computer, tablet or smartphone.

I know what you're thinking, how is this any different than any other online casino games? Well, let me introduce you to one of these differences.

Dealer: "Okay, so what do you want to do?"

On-screen text: Real time dealer interaction

Host: Like I said, it's busy. Let me explain. Live Casino means you're interacting with live dealers in real time. You got a question? They'll answer it. You got a comment? Share it, they'll respond. Every game, every hand and every time you play at Live Casino, you'll be playing with and against a real live dealer. And just like when you walk into a real casino, we've got a variety of games you can enjoy.

Like live BlackJack.

Live Baccarat.

Even live Roulette.

Look, I know, nothing can fully replace the feeling of walking in and sitting down at a real casino. But Live Casino is not about replacing anything. It's about giving access to that feeling of playing with and against real people.

Welcome to Live Casino. Didn't I tell you you'd love this?
